

STEEL FRAME AND ELEVATIONS

Frame and Elevations series: Several factors may influence the design of a given profile, such as the wall conditions where it will be installed, the door thickness, style considerations, and fire-rating requirements. We provide exceptional delivery turnaround times, even for special steel frame profiles.

ENVIRONMENTAL DATA SHEET

STEEL FRAME AND ELEVATIONS

PRODUCT CONTRIBUTION SUMMARY

LEED® v4 requirements for Building Design + Construction (BD+C)

New Construction, Core and Shell, Schools, Retail, Data Centers, Warehouse and Distribution Centers, Hospitality and Healthcare.

LEED® v4 requirements for Interior Design + Construction (ID+C)

Commercial Interiors, Retail and Hospitality.

MATERIALS AND RESOURCES		PRODUCT CONTRIBUTIONS	
MR	<p>Building Product Disclosure and Optimization – Environmental Product Declaration (EPD) Option 1: Environmental Product Declaration (1 point)</p> <p>The product contributes to this credit due to the availability of a product specific EPD (Type III) and are valued as 1 whole product out of the 20 needed for the purposes of credit achievement.</p>	Contribute	<p>ENVIRONMENTAL IMPACTS</p> <p>Product-specific (EPD) Type III Compliant to ISO 14025:2006</p>
MR	<p>Building Product Disclosure and Optimization – Sourcing of Raw Materials Option 2: Leadership extraction practices (1 point)</p> <p>Product meets at least one of the responsible extraction criteria: recycled content, wood product certification, biobased materials, extended producer responsibility.</p>	Contribute	<p>ATTRIBUTES</p> <p>Recycled content Pre-consumer: 14.1% - 23.9 % Post-consumer: 19.4 % - 34 %</p>
MR	<p>Building Product Disclosure and Optimization – Material Ingredients Option 1: Material ingredients reporting (1 point)</p> <p>The product contributes to this credit due to the availability of Health Product Declarations®. They are valued as 1 whole product out of the 20 needed for the purposes of credit achievement.</p>	Contribute	<p>INGREDIENTS AND EMISSIONS</p> <p>HPD® version 2.3 Health Product Declaration®</p>
INDOOR ENVIRONMENTAL QUALITY		PRODUCT CONTRIBUTIONS	
EQ	<p>Low-Emitting Materials Option 1: Product category calculation (1-3 points)</p> <p>Number of points depends on the LEED® rating system and the number of compliant categories. (Inherently nonemitting sources)</p> <p>Products that are inherently nonemitting sources of VOCs (stone, ceramic, powder-coated metals, plated or anodized metal, glass, concrete, clay brick, and unfinished or untreated solid wood) are considered fully compliant without any VOC emissions testing if they do not include integral organic-based surface coatings, binders, or sealants.</p>	Contribute	<p>INGREDIENTS AND EMISSIONS</p> <p>Powder-coated steel is excluded from the scope of this credit as it is an inherently nonemitting source.</p>

It is important to consider that the total amount of possible points reflects the number of achievable points in each credit category. The product itself cannot achieve this score, as defined above, but is considered as a beneficial element in order to achieve LEED® credits.

The data included in this Environmental Data Sheet has been provided by the client and the suppliers, who are responsible for its veracity and its integrity. Vertima follows a rigorous protocol, including a desktop audit of the factory data, also an audit of the manufacturer's supply chain documentation, the analysis and validation of all supporting documents. However, Vertima cannot be held responsible for false or misleading information that may cause any loss or damage suffered, caused in all or in part, by errors and omissions relative to the collection, compilation and/or interpretation of data.
